

This folder contains applications and reusable parts for my current projects

---

## Commercials Commander

---

This is an Electron based app that helps to construct and organize commercials' texts along with client lists + extra notes + stats

## WPF Storybook

---

React storybook inspired gallery for screens and screen elements + mocked data. Implemented with help Prism + AutoFac

User groups:

- project manager to quickly review application screens
- developers to quickly observe and test forms
- QAs to develop automated tests against screens / data models
